**WARNING**
- Prior to installation, remove all internal packaging materials and fasteners and discard properly.
- The Bug Pod is not a toy!
- NEVER leave child unattended when bathing.
- This product should ALWAYS be used ONLY under adult supervision.
- NEVER apply excessive force to or allow children to hang from the Bug Pod.
- ALWAYS position the product on the lower portion of the bath wall.

**CAUTION**
- Adult assembly required. Tools required (not included): For adhesive-mounting option — rubbing alcohol. For screw-mounting option — drill, 5/32” (4 mm) drill bit, hammer, Phillips screwdriver.
- Screws and anchors are small parts and can be choking hazards.
- Screws may have sharp edges and sharp points.
- Keep screws and anchors out of the reach of children at all times.

**MOUNTING INSTRUCTIONS**

Thank you for purchasing a Boon Bug Pod. In order to hang your Bug Pod, you must first secure the enclosed bracket to your bath wall. There are two options for mounting the bracket: 1) Adhesive strips or 2) Screws.

**MOUNTING OPTION 1
ADHESIVE STRIPS**

The enclosed bracket includes four adhesive strips. This durable adhesive is designed to withstand moisture. This adhesive forms a semi-permanent bond on most tile, glass, and fiberglass surfaces and will hold up to 10 lbs (4.5 kg). The adhesive can be removed without harming the wall surface. Adhesive strips can only be used once. For replacement adhesive strips or questions, please visit booninc.com.

**IMPORTANT!**

**FOLLOW INSTRUCTIONS CAREFULLY!** The adhesive strips will NOT stick to the bath wall if you do not follow each step of the instructions.

The adhesive strips will not stick to silicone-based tile sealants. If you have tile with a silicone-based sealant, we recommend using the screw-mounting option.

When using the adhesive strip mounting option, DO NOT load the Bug Pod with more than 10 lbs (4.5 kg) of toys and accessories.

**NOTE:** When using the adhesive strips, it is very important that you place the bracket onto the wall in its proper position ONLY ONCE. After the adhesive strips are placed on the wall, DO NOT try to remove and reposition the bracket as this will prevent the adhesive strips from adhering to the wall.

To attach bracket to the bathtub/shower wall, select an area where strips are touching the least amount of grout. If adhesive strips cross grout lines, be sure to firmly press adhesive into recessed areas.

It is important to maintain a wall surface temperature above 70°F (21°C) from the time you first place the adhesive strips onto the wall and throughout the entire 24 hour period before attaching the base. If you are mounting the adhesive strips on an exterior wall during cold weather, it may be necessary to increase the room temperature during this time.

When placing the bracket onto the cleaned wall surface, use thumb to press firmly over each of the adhesive strips. Rub while pressing to remove any air bubbles between adhesive strips and wall surface.

**STEPS:**

1. **Select a mounting location on the lower portion of the wall. Leave a minimum of 10” (25 cm) between the bottom of the bracket and any edge or raised surface of the bathtub.**

2. **THOROUGHLY clean dirt and residue from mounting area. Be certain that you clean the entire area where the adhesive strips will be attached.**

3. **Next, VIGOROUSLY wipe area with rubbing alcohol using a clean cloth.**

4. **Let dry fully for AT LEAST 10 minutes.**

5. **Remove backing from all adhesive strips. DO NOT TOUCH ADHESIVE. Hold bracket by its EDGES ONLY.**

6. **Make sure hook is in the upward position and level. Place bracket onto the cleaned area for mounting and be certain that ALL adhesive strips are pressed firmly against the wall. Press FIRMLY for 30 seconds.**

7. **Allow bracket to remain in place for AT LEAST 24 HOURS before attaching the base. It is important to maintain a room temperature of 70°F (21°C) or above throughout the entire 24 hour period. Also, avoid moisture and the use of cleaning chemicals near the wall bracket during the 24 hour period.**

8. **To attach base to bracket, fit slot over bracket hook and snap down into place.**

**REMOVING THE ADHESIVE STRIP BRACKET**

To remove the adhesive strip bracket, use a flat object, such as a screwdriver or a butter knife (covered with a soft cloth to avoid scratching the wall surface) to pry up one of the adhesive strips. After loosening the first strip, rotate the bracket to release the remaining strips. Any adhesive residue remaining on the wall can be pulled off easily.

**MOUNTING OPTION 2
SCREWS**

The wall bracket is also fitted with two holes that can be used to screw-mount the bracket to the grout lines of your tile wall. This is the most secure option for mounting your Bug Pod and will hold up to 20 lbs (9 kg).

**IMPORTANT!**

ALWAYS position the screw-mounting holes ON the grout lines. DO NOT drill through tile.

When using the screw-mounting option, DO NOT load the Bug Pod with more than 20 lbs (9 kg) of toys and accessories.

Mounting hardware and tools needed: 2 screws and 2 wall anchors are included for this option; Tools required (not included): drill, 5/32” (4 mm) drill bit, hammer, Phillips screwdriver.

**STEPS:**

1. **Select a mounting location on the lower portion of the wall. Leave a minimum of 10” (25 cm) between the bottom of the bracket and any edge or raised surface of the bathtub below.**

2. **Align holes on wall bracket with horizontal grout line on tile. Avoid drilling in an intersection of grout lines. Mark location of holes on grout line.**
3. Using the two marked locations, drill holes into the grout line approximately 1" (2.5 cm) deep.
4. Insert wall anchors into drilled holes.
5. Tap anchors lightly with hammer until the anchor is flush with the tile or grout.
6. Place wall bracket onto the wall aligning the bracket holes with the wall anchors. Make sure hook is in the upward position.
7. Screw stainless steel screws through holes in wall bracket and into center of wall anchors. Make sure the screws are tight and that the wall bracket is held tightly against the wall.
8. To attach base to bracket, fit slot over bracket hook and snap down into place.

**USING THE SCOOP**

To attach the scoop to the base, simply fit slot over hook and hang in place. To remove scoop, lift up then off the hook.

**CLEANING & CARE**

Remove Bug Pod base from the wall bracket by first holding the bracket securely in place on the wall, then pulling the base up and off the bracket hook. Clean base and scoop with warm water and mild soap.
